(54) Title: VIRTUAL CHARACTER PROCESSING METHOD AND APPARATUS, DEVICE, STORAGE MEDIUM, AND PROGRAM PRODUCT

(54) 发明名称: 虚拟角色的处理方法、装置、设备、存储介质及程序产品

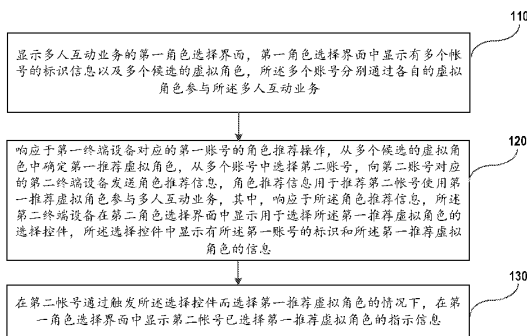

图 2

- 110 Display a first character selection interface of a multi-person interactive service, identifier information of multiple accounts and multiple candidate virtual characters being displayed on the first character selection interface, and the multiple accounts participating in the multi-person interactive service by means of respective virtual characters, respectively
- 120 In response to a character recommendation operation of a first account corresponding to a first terminal device, determine a first recommended virtual character from the multiple candidate virtual characters, select a second account from the multiple accounts, and send character recommendation information to a second terminal device corresponding to the second account, the character recommendation information being used for recommending the second account to use the first recommended virtual character to participate in the multi-person interactive service, wherein in response to the character recommendation information, the second terminal device displays a selection control, on a second character selection interface, used for selecting the first recommended virtual character, and an identifier of the first account and information of the first recommended virtual character are displayed in the selection control
- 130 When the second account selects the first recommended virtual character by triggering the selection control, display, on the first character selection interface, indication information that the second account has selected the first recommended virtual character

(57) Abstract: The present application relates to the technical field of Internet, and discloses a virtual character processing method and apparatus, a device, a storage medium, and a program product. The method comprises: displaying a first character selection interface of a multi-person interactive service, identifier information of multiple accounts and multiple candidate virtual characters being displayed on the first character selection interface; in response to a character recommendation operation of a first account corresponding to a first terminal device, determining a first recommended virtual character from the multiple candidate virtual characters, determining a second account from the multiple accounts, and sending character recommendation information to a second terminal device corresponding to the second account, the character recommendation information being used for recommending the second account to use the first recommended virtual character to participate in the multi-person interactive service; and when the second account selects the first recommended virtual character by triggering a selection control, displaying, on the first character selection interface, indication information that the second account has selected the first recommended virtual character.

本国际公布：

— 包括国际检索报告(条约第21条(3))。

(57) 摘要：本申请公开了一种虚拟角色的处理方法、装置、设备、存储介质及程序产品，涉及互联网技术领域。所述方法包括：显示多人互动业务的第一角色选择界面，所述第一角色选择界面中显示有多个帐号的标识信息以及多个候选的虚拟角色；响应于第一终端设备对应的第一帐号的角色推荐操作，从多个候选的虚拟角色中确定第一推荐虚拟角色，从所述多个帐号中确定第二帐号，向所述第二帐号对应的第二终端设备发送角色推荐信息，所述角色推荐信息用于推荐所述第二帐号使用所述第一推荐虚拟角色参与所述多人互动业务；在第二帐号通过触发所述选择控件而选择第一推荐虚拟角色的情况下，在第一角色选择界面中显示第二帐号已选择第一推荐虚拟角色的指示信息。
