

**ABSTRACT**

Filter (1) for infusion medical lines comprising a  
box-like body (2) within which there are arranged four  
5 filtering hydrophilic membranes (16A,16B,16C,16D)  
parallel and spaced from each other so as to form three  
interspaces (23A,23B,23C) placed in communication with  
the inlet connector (9) of the liquid to be filtered.
