(54) Title: MEASURING SCOOP AND SUPPORT FOR A CONTAINER

FIG. 1

(57) Abstract: In insert (12) is provided for use with a container and for positioning in the container opening. The insert includes a body (26) having an outer periphery dimensioned for receipt within container opening. A utensil (28) is frangibly secured to the insert body within an internal open area. A receiving tab (40) is provided that projects from the body into the open area. An engagement structure is formed on the utensil and on the receiving tab. The engagement portions cooperate with one another for removably securing the utensil to the receiving tab after the frangible connection to the body is removed.
