ABSTRACT

A rotor core (31) includes: a plurality of laminated electrical steel sheets (10); a fixing portion (11) that fixes electrical steel sheets (10) adjacent to each other in a lamination direction together; and a first adhesive portion (12A) that is partially provided in a region different from the fixing portion (11) between the electrical steel sheets (10) and has a fixing strength different from a fixing strength of the fixing portion (11). The electrical steel sheets (10) include a first portion (13) that is required to have a higher strength than that of other portions, the first portion (13) includes a bridge portion (14), and the first adhesive portion (12A) is provided so as to cover the first portion (13) of the electrical steel sheets (10).
