(54) **Title:** COMPUTER-IMPLEMENTED DASHBOARD PROVIDING DYNAMIC DIGITAL HEALTHCARE DATA

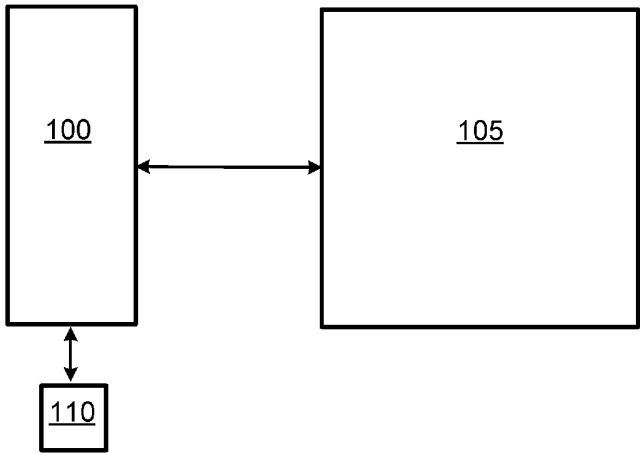

FIG. 1

(57) **Abstract:** A computer-implemented dashboard for providing digital healthcare data is generated by a computer system as a user interface for display on a display device operatively coupled to the computer system. The computer system generates a first plot including genetic and/or epigenetic and/or other marker test results for a patient determined by performing a genetic and/or epigenetic and/or other markers test on genetic and/or epigenetic and/or other markers obtained from the patient to evaluate a presence of a disease in the patient. Superimposed on the plot is genetic and/or epigenetic and/or other marker test results for a patient population to which the patient belongs. The genetic and/or epigenetic and/or other marker test results for the patient population are obtained from a cohort test of the genetic and/or epigenetic and/or other markers test performed on the patient. The user interface is displayed on the display device. The first plot is displayed within the user interface.
