(54) Title: ATTACHABLE AND FOLDABLE SEAT

(57) Abstract: An attachable and foldable seat that includes a seat connected to a first pivot and attachment member. The first pivot and attachment member connects the seat to a mounting bracket affixed to the body and allows the seat to move between a first, extended and second folded position. A leg is attached the bottom surface of the seat by a pivot member that allows the leg to rotate between a first extended position and a second folded position in response to movement of the chair.
