

Abstract**PHARMACEUTICAL PREPARATION WITH CURCUMINOIDS NANOPARTICLES AND A METHOD FOR PRODUCING THE SAME**

5

The present disclosure relates to a pharmaceutical composition having a mixture containing curcuminoids as at least one of the active therapeutic agents. Generally, the mixture comprises 4– 8% by weight of purified curcuminoids; 20 – 35% by weight of an oil phase; 25 – 35% by weight of a co-solvent; and 40 – 50% by weight of a surfactant. Preferably, the purified curcuminoids in the mixture has an average size of about 19nm or at least half of the curcuminoids carried in the mixture has particle size not exceeding 19 nm.
