**(54) Title:** MOBILE CHARACTER CONTROL SYSTEM

(57) **Abstract:** A mobile character control system that includes a platform, a character assembly, a control system, and a transportation assembly. The platform is configured to support an operator. The character assembly is engaged with the platform and includes actuable features configured to simulate movement of a creature. The control system is configured to control activation of the actuable features of the character assembly in response to signals received from control features controlled by the operator. The transportation assembly is configured to direct movement of the platform, and the transportation assembly is configured to support the character assembly.
