(54) **Title:** CROSS TALK REDUCTION FOR HIGH-SPEED ELECTRICAL CONNECTORS

(57) **Abstract:** An electrical connector includes a printed circuit board that includes a body that carries a plurality of ground conductors that define respective ground contact pads, and a plurality of signal conductors that define respective signal contact pads. The contact pads are configured to mate with electrical contacts of a complementary electrical connector. The printed circuit board includes a ground coupling assembly that electrically connects at least a pair of the ground conductors.
