(54) Title: TECHNIQUES FOR DETERMINING WHETHER AN EVM REQUIREMENT IS SATISFIED

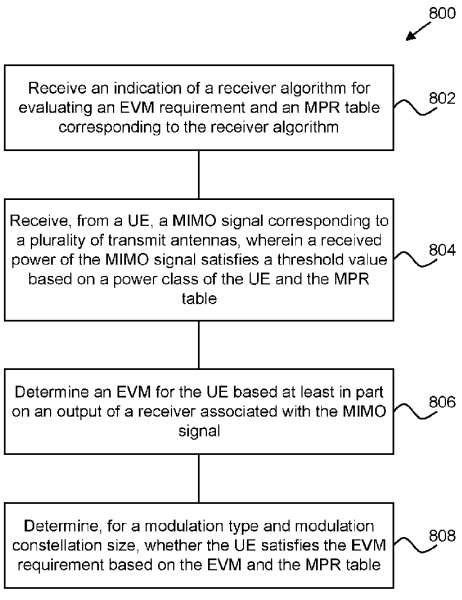

FIG. 8

(57) Abstract: Various aspects of the present disclosure relate to receiving (802) an indication of a receiver algorithm for evaluating an EVM requirement and an MPR table corresponding to the receiver algorithm. Aspects of the present disclosure may relate to receiving (804), from a UE, a MIMO signal corresponding to a plurality of transmit antennas, wherein a received power of the MIMO signal satisfies a threshold value based on a power class of the UE and the MPR table. Aspects of the present disclosure may further relate to determining (806) an EVM for the UE based at least in part on an output of a receiver associated with the MIMO signal and determining (808), for a modulation type and modulation constellation size, whether the UE satisfies the EVM requirement based on the EVM and the MPR table.
