(54) Title: PARKING SPACE HOLDER**(57) Abstract**

A parking space holder (10, 110) including a plurality of telescoping sections (12, 112) that can be locked in an upright, extended position to block an entrance to a parking area or space. When unlocked, the space holder (10, 110) can be collapsed to a position flush with the parking surface to allow passage of a car. The user may use any number of the devices to designate a parking area. The device may either be manually operated, or operated by remote control.
