WORKTABLE

ABSTRACT OF THE DISCLOSURE

The invention relates to a worktable, particularly for workshops, with downwardly open, U-shaped frames for supporting a table plate. The U-shaped frames have a front frame spar, a rear frame spar and an upper transverse spar, which links the front and rear frame spars.

In order to create a worktable, which can be manufactured particularly simply and inexpensively and has a particularly high stability, according to the invention U-shaped girders are provided, which are positioned with an upwardly directed opening and are constructed for receiving and guiding the downwardly open, U-shaped frames.
