(54) Title: REMOTE CONTROL ARRANGEMENT

Figure 12

(57) Abstract: The present invention relates generally to an arrangement for delivering information to the user of a mobile device where the information presented to the user is associated with information that has a temporal or contextual or location based association with other information also presented to the user. In one example the mobile device is a device used to remotely control one or more controllable devices, such as a television, personal video recorder, and/or digital radio receiver, and additional multi-media information is made available to the user interface of the remote control to the user at the time the source information is being viewed/listened to or provided to the user regardless of when the source was generated or broadcast.
