(54) Title: SYSTEM AND METHOD FOR RAPIDLY LOCATING HISTORICAL PERFORMANCE DATA

(57) Abstract: A method is described for providing performance metrics stored in an array of at least three-dimensions. The method includes receiving at least one metric criteria associated with a performance metric. The method also includes determining a list of array elements. The list represents a portion of the array including the at least one metric criteria. The method further includes sorting the list of array elements according to predetermined ordering criteria to identify a best match of the at least one metric criteria. A system and article of manufacture are also described for providing performance metrics stored in an array of at least three dimensions.
