

**PIECE OF JEWELRY COMPRISING A CHAIN WITH CLIP(S) FOR MAKING A
VERSATILE ADORNMENT**

ABSTRACT

Piece of jewelry comprising at least one chain (1) having two ends, at least one of the two ends comprising a hollow clip (2) fixed by a fixing device (3), the clip (2) consisting of two half-shells (21, 22), each half-shell (21, 22) comprising an extended edge (25, 26) delimiting a hollow internal space of the half-shell (21, 22), the edges (25, 26) comprising notches (24) into which the chain (1) can be inserted, the half-shells (21, 22) being hinged together by an articulation (20) between a closed position in which the two edges (25, 26) are brought together to close the clip (2) and an open position in which the two edges (25, 26) are separated over at least part of their extents in order to allow a portion of the chain (1) to be inserted between the two edges (25, 26) and through the internal space and so that the portion of the chain (1) is retained in the clip (2) by being blocked as to extraction and translation once the clip (2) is closed.
