

A GLASS STRUCTURE

5 **Abstract**

Disclosed herein is a glass structure comprising a glass substrate, a first dielectric layer formed over the glass substrate and having a high refractive index, a second dielectric layer formed over the first dielectric layer and having a low refractive index, a third dielectric layer formed over the second dielectric layer and having a high refractive index such that the
10 second dielectric layer interposes the first dielectric layer and the third dielectric layer, a fourth dielectric layer formed over the third dielectric layer and having a low refractive index such that the third dielectric layer interposes the second dielectric layer and the fourth dielectric layer, and a fifth dielectric layer formed over the fourth dielectric layer and having a high refractive index such that the fourth dielectric layer interposes the third dielectric
15 layer and the fifth dielectric layer.
