

Abstract**DISPENSER FOR SUPPORTS TO BE IMPREGNATED WITH AN ODOUR**

- 5 The invention relates to a machine for dispensing perfume-testing supports, comprising support storage means (4) for storing a batch of supports (40), support-dispensing means (6) for transporting the supports one by one to a delivery point, and support impregnation means (2) for depositing a perfume sample on each dispensed support, before the dispensing thereof. The
- 10 dispensing means comprise support-marking means (62) for marking each dispensed support (40) at the moment of the dispensing thereof, the marking means and the impregnation means being automatically actuated during the dispensing process.
