(54) Title: AN ARTIFICIAL INTELLIGENCE PAMPER ANGEL HEALTH SYSTEM & METHOD

FIG. 1

(57) Abstract: This invention discloses an Artificial Intelligence Pamper Angel Health System and Method (AIPA Health). Combined with AI technology, this invention improves the collection efficiency and accuracy of personal health imaging data. Personal health imaging data are acquired from exposed parts of a user through visible optical means and non-visible means such as infrared or hyper-spectral imaging. The acquired data are stored in a cloud analysis server. In combination with Traditional Chinese Medicine diagnostic, this technology can build a deep learning model for users. The acquired data will be compared and analysed against the medical imaging database and the results will be sent to the user together with warning of any abnormalities and suggestions for health improvement. This invention provides personal health caring, reduces individual health care cost and social medical care expenses, to achieve the ultimate goal that prevention is better than treatment.
