(54) Title: **VEHICLE TRACK CHAIN AND LINK THEREFOR**

(57) Abstract: A chain link (1) for a track chain of a chain traction vehicle includes a link body (2) having opposite sides (3). Two link pins (14) extending from each side (3) of the link body (2) in spaced apart relation in a direction of intended travel of the track chain. Connectors (18) are connected to and extending from at least one of the link pins (14). Each connector (18) is also connectable to a juxtaposed pin of an adjacent link (1) so as to interconnect the links (1) into a chain formation. An opening (20) is located outwardly of each side (3) of the link body (2) and between the pins (14) for receiving teeth of sprocket wheels on which the chain is mounted for driving travel of the chain. Fasteners (23) connect with the pins (14) in order to secure the connectors (18) to the pins (14) and interconnect adjacent links into the chain formation. An endless track chain formed of links (1), and connectors (18) for the links (1) are also disclosed.
