(54) Title: PROCESSING FINANCIAL TRANSACTIONS

Figure 1

(57) Abstract: Systems and methods for processing a financial transaction are provided. In a method conducted at an issuing server computer associated with a first entity, a transaction request message is transmitted to an acquiring server computer associated with a second entity. The transaction request message is in respect of a push transaction in which funds from the first entity are transferred to the second entity and includes a first set of data elements. In response to transmitting the transaction request message, a transaction response message and a second set of data elements are received. The second set of data elements are associated with the first set of data elements and the financial transaction is processed using information contained in the first set of data elements and the second set of data elements.
