

ABSTRACT

An object of the present invention is to provide a noodle-shaped composition having good taste, flavor, and texture even when bean flour is blended, a method for producing the noodle-shaped composition, and a noodle set. The present invention relates to a noodle-shaped composition containing 35 mass% to 85 mass% of bean flour in terms of powder mass, in which a proportion of starch in the noodle-shaped composition is 20 mass% to 60 mass%, and a proportion of gluten in the noodle-shaped composition is 7 mass% to 25 mass%.
