(54) Title: ANTI-FUCOSYL-GM1 ANTIBODIES

Figure 1

(57) Abstract: The present invention relates to specific binding members, such as antibodies and fragments thereof, that are capable of specifically binding fucosyl-GM1 (Fuc-GM1). It also relates to the use of such binding members in medicine and to nucleic acids encoding such binding members, to methods for detecting Fuc-GM1, as well as methods for treating various diseases, including cancer, using anti-Fuc-GM1 antibodies.
