(54) Title: CAPSULE SYSTEM WITH FLOW ADJUSTMENT MEANS

Fig. 3

(57) Abstract: The present invention relates to a capsule system for preparing beverages by centrifugation of a capsule (1) in a centrifuging brewing device comprising: -a centrifuging brewing device comprising control means (25) capable of operating the device in centrifugation by controlling the beverage flow rate and/or the volume of the beverage, and -a capsule to be inserted in the brewing device wherein the capsule is designed to form, alone or in cooperation with the centrifuging brewing device, a flow restriction or flow restriction valve which provides a backpressure for the centrifuged liquid, wherein the control means (25) of the device selectively adjusts the rotational centrifugation speeds of the inserted capsule (1) and/or the volume of injected liquid in the capsule as a function of the exerted backpressure by the restriction or restriction valve.
