

ABSTRACT OF THE DISCLOSURE (FIG. 4)

"DISPLAY AND ARRAY SUBSTRATE"

A display includes an insulating substrate, an auxiliary line placed on a main surface of the insulating substrate, an insulating underlayer covering the auxiliary line and the main surface of the insulating substrate and provided with a through-hole which communicates with the auxiliary line, pixel electrodes arranged on the insulating underlayer and surrounding an opening of the through-hole, photo-active layers each covering the pixel electrode and each including a light-emission layer, and a light-transmissive common electrode covering the photo-active layers and electrically connected to the auxiliary line via the through-hole.
