(54) Title: METHOD AND DEVICE FOR ASEPTICALLY DISPENSING MULTIPLE PORTIONS OF A FLUID

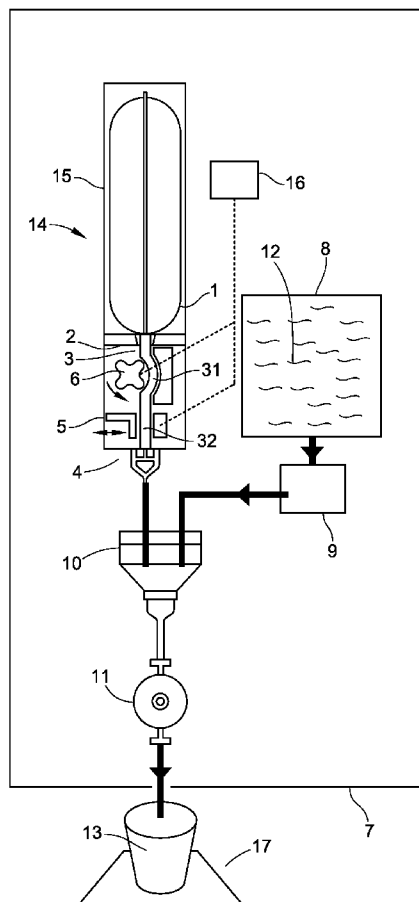

FIG. 1

(57) Abstract: A method and a device for dispensing multiple portions of a fluid, the fluid being stored in a container comprising a port and a flexible dispensing tube having an inlet and an outlet, the inlet being integrally sealed to the port and viscoelastic valve is mounted in the outlet. The method comprising a compression step and a step of terminating compression wherein the method comprises a further step implemented at the end of the compression step of releasing the pressure in the tube portion between the first tube portion and the valve.
