ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.*

(54) Title: PRECHARGE SUGGESTION

(57) Abstract: Machine-readable media, methods, and apparatus are described which process memory transactions. In some em-
bodiments, a processor requests an external memory controller to close a storage location of a memory associated with a first memory
transaction based upon a relationship between the first memory transaction and a second memory transaction.
