(54) Title: A MODULAR ACCESSORY CONNECTING SYSTEM FOR A HEADGEAR

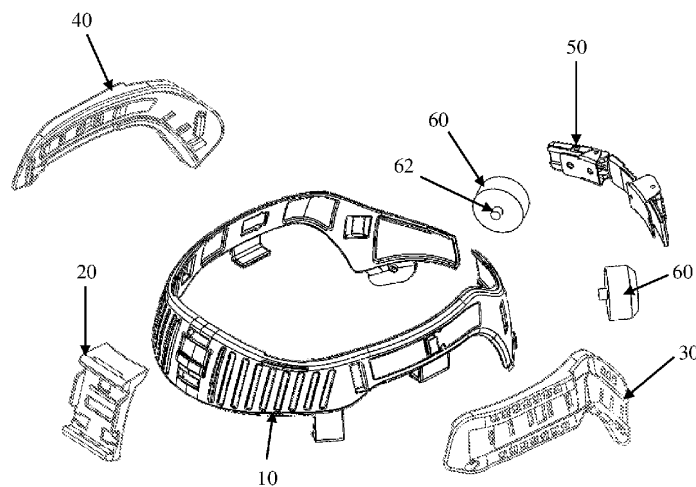

Figure 1

(57) Abstract: The present disclosure discloses a modular accessory connecting system (100) for a headgear (5). The system (100) comprises a band (10) detachably mounted on the headgear (5) and a frontal shroud (20), a pair of rails (30, 40), and counterweights (60) removably mounted on an operative front, left and right, and rear surfaces respectively of the band (10). The system (100) includes a toggleratchet (50) mounted on an operative rear surface of the headgear (5). The toggleratchet (50) facilitates adjustable locking of the band (10) on the headgear (5). The entire assembly including the band (10), the rails (30, 40), the frontal shroud (20) and the counterweights (60) can be attached or removed from headgear (5) without using any tools. The frontal shroud (20) and the rails (30, 40) comprise a modular fixation mechanism to allow the accessories to be easily attached to and removed from the headgear (5).
