

ABSTRACT

DATA STORAGE SYSTEM, IMAGE PROCESSING DEVICE, PORTABLE TERMINAL,
AND PROGRAM

An image processing device includes storage unit, a communication portion and an image processing function control portion. The storage unit stores image data. The communication portion performs communication with a server and a portable terminal. The image processing function control portion causes the communication portion to transmit the image data stored in the storage unit to the server and causes the communication portion to transmit the image data to the portable terminal in response to failure of the transmission of the image data to the server by the communication portion.
