(54) Title: SYSTEMS AND METHODS FOR BLOOD PRESSURE DEVICE CALIBRATION

(57) Abstract: Techniques and systems for calibrating a blood pressure measuring device are disclosed. They include sensing a first blood pressure by a first device when the first device is at a first height, sensing a second blood pressure by the first device when the first device is at a second height, the second height being different than the first height, and generating the blood pressure calibration factor based on the first blood pressure, the first height, the second blood pressure, and the second height.
