(54) Title: SYSTEM AND METHOD FOR INTEGRATED CIRCUIT CARD DATA STORAGE

(57) Abstract: A system and method for obtaining and storing information in an integrated circuit card is provided for use in a transaction over different environments. The card includes a memory unit having data records including formatted and unformatted fields, preferably comprising a name field, a data field and a security level field. The formatted fields are accessible, using generic labels and the unformatted fields are accessible using a non-generic label.
