Parameters		
Parameters for 'Join'		
Name	Value	Resolved Value
count	2	2
sorted input	True	True
key	{}	{}
transform	out :: join(c0, c1) = begin end	out :: join(c0, c1) = begin end
join type	Inner Join	Inner Join
dedup0	False	False
dedup1	False	False
select0		
select1		
override key 0		
override key 1	{}	{}
max memory	8388608	8388608
check sort	False	False
sql null comparisons	False	False
error group		
log group		
reject threshold	Abort on first reject	Abort on first reject
