(54) Title: AN ARTIFICIAL REEF AND A METHOD OF CONSTRUCTING AN ARTIFICIAL REEF

(57) Abstract: A method of constructing an artificial reef. The method includes attaching a reef element (2) to a support structure (100). The support structure (100) and the attached reef element (2) are then transported to a location on the surface of a body of water above an installation location on the seabed. The support structure (100) is secured to the seabed using a coupling means (4) while the support structure (100) and the reef element (2) are at the surface location. The support structure (100) and the reef element (2) are then moved from the surface to the installation location on the seabed using the coupling means (4).
