

ABSTRACT

CLOTHING SUCH AS SHORTS

The invention provides clothing such as shorts which is capable of fitting excellently to the lower region of the hips of a person and certainly preventing hip hemlines thereof from rising. The clothing includes a stretchable front covering portion 11 and a stretchable back covering portion 12, and a gusset portion 13 disposed between an inner-crotch front portion 16 at the lower end of the front covering portion 11 and an inner-crotch back portion 17 at the lower end of the back covering portion 12 and covering the crotch of the person. A body 14 is opened and developed along a back center line S2 of the back covering portion 12, and in the developed body 14, with respect to a front center line S1 of the front covering portion 11, the back center line S2 of the back covering portion 12 is set so that the downward extended line of the back center line S2 approaches the downward extended line of the front center line S1 in a downward narrowing manner.
