

Abstract**ASSEMBLY FOR ACCESSING COCONUT WATER IN COCONUT**

5 The present invention provides an assembly for accessing coconut water in a coconut comprising a screw having a rod with spiral threads on the outside surface of the rod and a sharp tip for drilling through coconut shell, and a handle on the top of the rod for twisting the rod through the coconut shell; and a lid having a threaded through-hole on the vertical center thereof for receiving and housing a sharp tip of the rod, wherein the lid of the assembly is
10 placed and fixed on the germination pore of the coconut by a fixing means and wherein the screw is prevented from drilling the coconut shell by locking means.
