(54) **Title:** GUIDING METHOD AND APPARATUS IN THREE-DIMENSIONAL VIRTUAL ENVIRONMENT, DEVICE, AND MEDIUM

(54) 发明名称: 三维虚拟环境中的指引方法、装置、设备及介质

(57) **Abstract:** The present application relates to the field of virtual environments. Disclosed are a guiding method and apparatus in a three-dimensional virtual environment, a device, and a medium. The method comprises: in response to a marking operation, displaying a marked target location, the target location being a target landing location located on three-dimensional virtual environment ground (220); when a main control virtual character jumps out of an aircraft and is in a landing state, displaying three-dimensional path guidance pointing to the target location, the three-dimensional path guidance comprising a three-dimensional line connecting a first position where the main control virtual character is located in the air and the target location on the ground, and the three-dimensional path guidance being used for indicating a manipulation mode for controlling the main control virtual character to land from the first position

to the target location (240); and in response to a change of the position of the main control virtual character, updating and displaying the three-dimensional path guidance according to a changed second position (260). According to the solution, an operation instruction of parachuting can be provided according to the target location, so that the main control virtual character can be conveniently controlled to land to the target location.

(57) 摘要: 本申请公开了一种三维虚拟环境中的指引方法、装置、设备及介质, 属于虚拟环境领域。方法包括: 响应于标记操作, 显示被标记的目标地点, 目标地点为位于三维虚拟环境地面上的目标降落地点(220); 在主控虚拟角色跳出飞行器处于降落状态的情况下, 显示指向目标地点的三维路径指引, 三维路径指引包括连接主控虚拟角色在空中所处的第一位置与地面上的目标地点的三维线条, 三维路径指引用于指示控制主控虚拟角色从第一位置降落至目标地点的操控方式(240); 响应于主控虚拟角色的所处位置发生, 根据改变后的第二位置更新显示三维路径指引(260)。上述方案可以根据目标地点提供跳伞的操作指示, 便于控制主控虚拟角色降落到目标地点。
