(54) Title: MOBILE RADIO COMMUNICATION DEVICES AND METHODS FOR CONTROLLING A MOBILE RADIO COMMUNICATION DEVICE

FIG 21A

(57) Abstract: According to various embodiments, a mobile radio communication device may be provided. The mobile radio communication device may include: a receiver configured to receive data; an access point identification circuit configured to determine whether the received data is received from or sent to an access point corresponding to the mobile radio communication device; and a response indication deferral setting circuit configured to set a response indication deferral parameter based on the determination of the access point identification circuit.
