

ABSTRACT OF THE DISCLOSURE

The main body portion (22) of a fan housing (22a) and a drain pan (28) are molded integrally of styrofoam. A pipe pressing plate (34) for fixing the pipe of a heat exchanger (4) is formed by insert
5 molding. Left and right heat insulating plates (38) and (39) each composed of a styrofoam plate are disposed on both sides of the heat exchanger (4). Support pieces (40) and (41) for supporting the side portions of the heat exchanger (4) are provided on the respective inner faces of the heat insulating plates (38) and (39).
10 A partition plate (48) composed of a styrofoam plate is provided between the heat exchanger (4) and a front panel. A plurality of wire grooves (49) for fixing wires held therein are formed in the front face of the partition plate (48) integrally therewith.
