(54) Title: SYSTEM AND METHOD FOR MONITORING TRAVELING VEHICLES

(57) Abstract: Implementing the system and method in accordance with the present invention affords ability to determine whether a driver is guilty of bearing a faulty set of driving regulatory documents DRDs. The law-enforcement agent using the system and method in accordance with the present invention is able to identify remotely vehicles having faulty DRDs. In accordance with the present invention, the currently used hard copies of the DRD are supplemented or altogether replaced by stored data in a digital storage medium. The storage medium can be installed in the driver's car or the data may be stored in a centralized law enforcement database. The police may access the database in order to retrieve information regarding the validity of the driver's permits. In the scenario wherein the digital storage medium is located in the driver's car, typically one or more smart cards or RFID cards or flash memory devices or discs may be used to store the current data.
