(54) Title: CUTE USER INTERFACE

(57) Abstract: A method for navigating information in a mobile terminal. The method includes displaying, on a graphical user interface of the mobile terminal, plurality of window regions, wherein each region is a container for objects and provides an overview of contents of the terminal and a status of the terminal. Receiving a first user input to make a selection of one of the regions and in response to the first user input, displaying at least one object corresponding to a selected region in a central portion of the graphical user interface and displaying other non-selected regions that have a relationship to the selected region in a secondary manner. At least one management tool for accessing information related to the selected region is displayed and, upon activation of the at least one management tool, the information selected is displayed.
