### **Abstract of the Invention**

The *Octopux Wordx* is a word formation board game that is played on a board with lines drawn isometrically at 120 degrees and 60 degrees and where the words can be formed diagonally besides the usual vertical and horizontal planes.

The *Octopux Wordx* board game also allows a player to change the alignment of a line of words that had already been formed if this change of alignment will allow the player to form another word without changing the other words that had already been formed on the board.
