(54) Title: INFORMATION PROCESSING APPARATUS, CONTROL METHOD AND COMPUTER-READABLE RECORDING MEDIUM

FIG.2

(57) Abstract: An information processing apparatus includes a hardware button configured to enable a user to press; a control unit configured to define a predetermined press process executed in response to a press of the hardware button; a processing unit configured to execute a predetermined process; a press detection unit configured to detect the press of the hardware button; a press process rejection unit configured to instruct the control unit to reject the execution of the press process when the press of the hardware button is detected; and a process execution unit configured to instruct the processing unit to execute the predetermined process when the press of the hardware button is detected.
