CLAIMS

1. A recombinant DNA molecule comprising a polynucleotide selected from the group consisting of:

a) a polynucleotide with at least 95 percent sequence identity to SEQ ID NO: 5, wherein the polynucleotide has promoter activity;

b) a polynucleotide with at least 97 percent sequence identity to SEQ ID NO: 4, wherein the polynucleotide has gene-regulatory activity;

c) a polynucleotide comprising SEQ ID NO: 4 or 5; and

d) a fragment comprising at least 150 contiguous nucleotides of SEQ ID NO: 5, wherein the fragment has promoter activity;

wherein said DNA molecule is operably linked to a heterologous transcribable DNA molecule.

2. The recombinant DNA molecule of claim 1, wherein said polynucleotide has at least 97 percent sequence identity to SEQ ID NO: 5.

3. The recombinant DNA molecule of claim 2, wherein said polynucleotide has at least 99 percent sequence identity to SEQ ID NOs: 4 or 5.

4. The recombinant DNA molecule of claim 3, wherein said polynucleotide comprises the DNA sequence of SEQ ID NO: 4 or 5.

5. The recombinant DNA molecule of claim 1, wherein the heterologous transcribable DNA molecule comprises a gene of agronomic interest.

6. The recombinant DNA molecule of claim 5, wherein the gene of agronomic interest confers herbicide tolerance in plants.

7. The recombinant DNA molecule of claim 5, wherein the gene of agronomic interest confers pest resistance in plants.

8. A transgenic plant cell comprising a recombinant DNA molecule comprising a polynucleotide selected from the group consisting of:

a) a polynucleotide with at least 95 percent sequence identity to SEQ ID NO: 5, wherein the polynucleotide has promoter activity;

b) a polynucleotide with at least 97 percent sequence identity to SEQ ID NO: 4, wherein the polynucleotide has gene-regulatory activity;

c) a polynucleotide comprising SEQ ID NO: 4 or 5; and

d) a fragment comprising at least 150 contiguous nucleotides of SEQ ID NO: 5, wherein the fragment has promoter activity;

wherein said DNA molecule is operably linked to a heterologous transcribable DNA molecule.

9. The transgenic plant cell of claim 8, wherein said transgenic plant cell is a monocotyledonous plant cell.

10. The transgenic plant cell of claim 8, wherein said transgenic plant cell is a dicotyledonous plant cell.

11. A transgenic plant, or part thereof, comprising the recombinant DNA molecule of claim 1.

12. A progeny plant of the transgenic plant of claim 11, or a part thereof, wherein the progeny plant or part thereof comprises said recombinant DNA molecule.

13. A transgenic seed, wherein the seed comprises the recombinant DNA molecule of claim 1.

14. A method of producing a commodity product comprising obtaining a transgenic plant or part thereof according to claim 11 and producing the commodity product therefrom.

15. The method of claim 14, wherein the commodity product is protein concentrate, protein isolate, grain, starch, seeds, meal, flour, biomass, or seed oil.

16. A method of expressing a transcribable DNA molecule comprising obtaining a transgenic plant according to claim 11 and cultivating plant, wherein the transcribable DNA is expressed.
