

ABSTRACT

OIL COUNTRY TUBULAR GOODS, THREADED JOINT FOR OIL COUNTRY TUBULAR GOODS, AND COATING MATERIAL

5

Provided is a threaded joint for oil country tubular goods having a solid lubrication coating film having good lubricity and rust prevention. There are provided oil country tubular goods constituting a box
10 (2) or a pin (1) used for a threaded joint for oil country tubular goods, the threaded joint formed by connecting the box (2) having a female thread and the pin (1) having a male thread, the oil country tubular goods including: a resin coating film containing an
15 alkaline soap as a solid lubricant in a binder resin, as an outermost layer of a thread portion. The resin coating film has a surface on which an alkaline soap layer is formed.
