

ABSTRACT

METHOD AND APPARATUS FOR EXTRACTING A USER

ATTRIBUTE, AND ELECTRONIC DEVICE

5 A method and an apparatus for extracting a user attribute, and an electronic device include: receiving image data sent by a second terminal; extracting user attribute information based on the image data; and determining a target service object corresponding to the user attribute information. Current biological images of the user are obtained in real time; it is easy and convenient; authenticity of the user attribute
10 information may be ensured; the target service object is determined by means of the user attribute information, which is more in line with current demands of the user.
