

ABSTRACT

METHOD FOR INSPECTING AN INSIDE ROOM OF A SHIP AND/OR PERFORMING WORKS THEREIN

The invention relates to a method for inspecting an inside room of a ship and/or performing works therein, wherein the inside room is preferably a cargo tank, a sludge tank, a ballast tank or a cargo hold. The method comprises the following steps:

- a) inserting, through an opening preferably provided in a ceiling portion of the inside room, accommodating means (10; 100) for accommodating at least one person;
- b) attaching at least one rope (12) at an upper part of the inside room, wherein the at least one rope is attached at the upper part of the inside room
 - i. manually by one or a plurality of climbing persons using climbing equipment, and/or
 - ii. by means of a drone, and/or
 - iii. by means of a pivotable rod; and
- c) moving the accommodating means up and down along the at least one rope for inspecting the inside room and/or performing works therein by at least one service person accommodated by the accommodating means.
