(84) Designated States (unless otherwise indicated, for every kind of regional protection available): ARIPO (BW, CV, GH, GM, KE, LR, LS, MW, MZ, NA, RW, SD, SL, ST, SZ,

(54) Title: ARRANGEMENT FOR AMPHIBIOUS TRACKED VEHICLE

Fig. 2

(57) Abstract: The invention relates to an arrangement (A) for facilitating amphibious operation of a tracked vehicle (V1; V2). Said tracked vehicle comprises one or more vehicle bodies (10; 10, 10A) and at least one track assembly pair (T1, T2; T1, T1A) per vehicle body. Said track assembly pair is connected to the vehicle body, the track assembly pair comprising two track assemblies (T1, T2; T1, T1A) for driving the vehicle. Each track assembly (T1, T2; T1, T1A) comprises a drive means driven endless track (4; 4, 4A) arranged to run over a set of wheels (1, 2, 3; 1, 2, 3, 1A, 2A, 3A) of the track assembly and, in connection to amphibious operation, being configured to operate under the water surface by rotating in the water providing a flow of water so as to provide a swimming operation of the vehicle. The arrangement (A) comprises gas provision device (100) configured to, in connection to swimming operation, introduce a gaseous medium (G) into the flow of water at the upper side (4a) of the track (4; 4, 4A) of the respective track assembly (T1, T2; T1, T1A) so as to reduce the amount of water in connection to said upper side. The invention also relates to a tracked vehicle comprising such an arrangement.
