CLAIMS

1. A canine bolus bag comprises one or more sheets of foldable material comprising;

a back sheet comprising a rear body and first and second projections extending upwardly from the body;

the first and second projections integral with and extending upwardly from the back sheet in spaced relation to define an aperture between the projections;

a front sheet comprising a forward body, secured to the rear body at one or more edges thereof to form an upwardly opening pouch which hangs downwardly from the first and second projections in use; and

~~the front sheet and~~ a third projection extending from an upper edge of the pouch, the third projection being arranged to hang downwardly from the upper edge adjacent the outside of the pouch in use so that the weight of the third projection pulls a central portion of the front sheet outwardly away from the back sheet to hold the bag open in use to form an upwardly opening pouch;

wherein the first and second projections are configured to be located on opposite sides of a dog's tail and tied together to secure the pouch;

wherein the three projections have lengths selected so that the third projection may be tied to one or both of the first or second projections to close the pouch after use.

2. A canine bolus bag as claimed in claim 1, formed from one or more sheets of foldable material.

3. A canine bolus bag as claimed in claim 2, comprising polymeric or paper sheet material.

4. A canine bolus bag as claimed in any preceding claim, wherein the front sheet has a greater width than the back sheet.

5. A canine bolus bag as claimed in any preceding claim, wherein the third projection hangs downwardly from a central location of the exterior of the pouch.

6. A canine bolus bag as claimed in claim 5, wherein the central location is lower than side locations adjoining the back sheet.

7. A bolus bag as claimed in any preceding claim, wherein the third projection comprises folded material.

8. A bolus bag as claimed in any preceding claim, including one or more adhesive pads on the exterior of the front sheet.

~~9. A bolus bag substantially as hereinbefore described and as illustrated in the accompanying drawings.~~

~~10.~~9. A continuous sheet of bags as claimed in any preceding claim, joined consecutively, end to end, by tearable perforated junctions and a container having an opening through which the sheet may be withdrawn in use.
