(54) Title: SCREW-ON GLASS CLOSURE AND PACKAGE

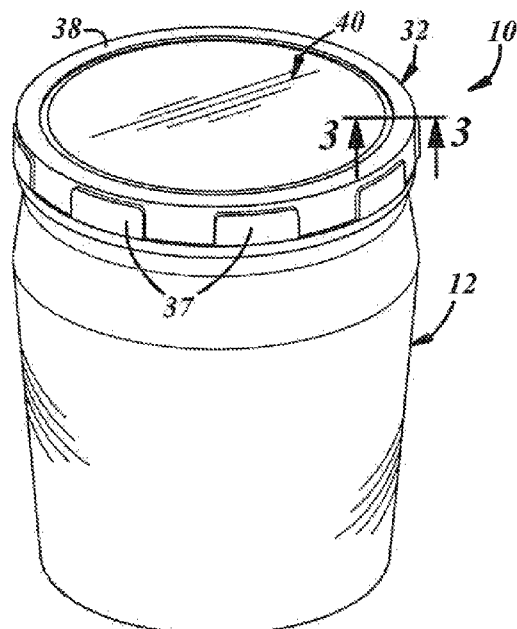

FIG. 1

(57) Abstract: A closure, and container package (10) includes a glass container (12) having an open mouth surrounded by an annular neck (14). An annular finish (20) has at least one external attachment feature (24) and is non-rotatably secured to the neck of container. An annular skirt (32) has at least one internal attachment feature (36) for removable securement to the finish and a glass closure (40) has a circular periphery (42) coupled to the skirt such that the skirt removably mounts the glass closure to the glass container. The finish can be of plastic or rubber, and the skirt preferably has a radially inwardly directed flange. The circular periphery of the glass closure preferably has a peripheral edge captured between the flange and a retention feature of the skirt. The peripheral edge of the glass closure preferably is annular and planar.
