(54) **Title:** DATA TERMINAL ACCESS CONTROL

(57) **Abstract:** A terminal can assume a working and a sharing position. Access to the terminal is controlled in dependence of the position assumed by the terminal. In the working position there is full access. In the sharing position access is limited to allow the proprietor of the terminal to pass the terminal on to other users for sharing content, whilst minimizing the risk of deliberate or accidental access to private and/or confidential data by the other usurers.
