(54) Title: ELASTOMERIC RELEASABLE CABLE TIE

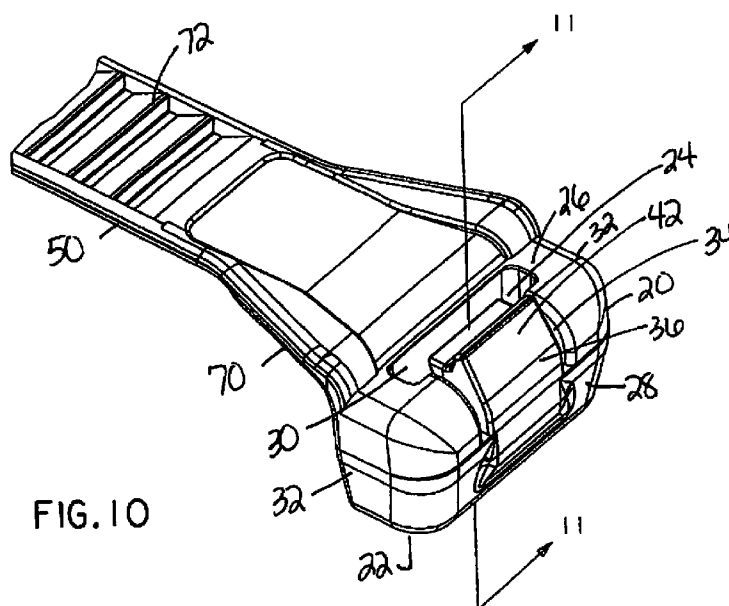

FIG. 10

(57) Abstract: The present invention is directed toward an elastomeric releasable cable tie (10) having a head (20) and a strap (50) extending from the head. The head includes an end wall (28), an inner wall (30) and sidewalls (32). The end wall, inner wall and sidewalls define a channel (34) that extends from an entrance end (22) to an exit end (26) of the head. The head also includes a hingeless wedge (36) extending from the end wall into the channel for engaging the strap.
